

Safety & Health Consultancy

RPS has provided Safety and Health services since 1988 and counts the majority of the major exploration companies and oilfield contractors among its clients.

With over 100 experienced and qualified personnel available for deployment, and having worked in more than 80 countries, the company has demonstrated its abilities to deliver reliable, quality services at the point of need.

From seismic, through drilling and construction, all services are available to guide and support managers in offices and in the field. Personnel are available for land, marine and aviation operations.

What we provide

Consultancy:

- The electronic management system (eMS), an internet based Safety, Health and Environment (SHE) management system, based on the requirements of the oil and gas producers (OGP) and the international association of geophysical contractors (IAGC)
- Design of project SHE plans
- Design of corporate SHE management systems
- Provision of project SHE managers
- SHE audits of field operation

Advisors:

- Field based advisors bringing positive advice and experience to operations

Training:

- The industry standard 2 day course 'SHE Management for Seismic Operations'
- 30 courses designed according to OGP guidelines
- A range of computer based training courses for on-site learning, internet testing and feedback
- Defensive and off-road driving, small boat training and crew inspections
