

Mobile Screening Bringing Healthcare to you

RPS's mobile screening units provide a flexible mechanism for delivering tailored health surveillance/screening programmes direct to you.

The mobile units are ideal for SME's or larger organisations who have a number of sites or remote operations.

Each workplace is different, with unique hazards and risks, and the components of our programmes can be designed to reflect your local requirements.

The mobile units are fully equipped to carry out screening which includes: audiometry, lung function, eye tests, blood pressure, and general health reviews.

What are the benefits to you?

- Onsite Health Screening Programmes
- Minimal loss of working time
- Compliance with current legislation
- Statistical reporting to employers
- Feedback to individual employees
- Individual Health Records to employers
- Reduced risk and cost of litigation
- Improved profitability

How can RPS help you?

RPS is a leading provider of Occupational Health services across the UK.

Our dedicated Mobile Screening team will work with you through the set up phase to ensure onsite visits run effectively and efficiently.

On completion of a screening programme each employee will receive a personal health summary. The employer will receive a non-confidential health record for each individual along with group anonymised analysis.

Our mobile units are manned by experienced Medical Technicians, supported by Occupational Health Nurses and Occupational Physicians, to follow up and report on each programme.

Working with organisations of all sizes it is our aim to deliver a timely response and cost effective service designed to meet the needs of your modern business.

RPS Business Healthcare

Services Include:

- Tailored OH Packages
- OH Audit & Policy Advice
- Pre-employment Assessments
- Health Surveillance
- Statutory Medicals
- Mobile Health Screening
- Absence Management
- Executive Health Screening
- Pension Scheme Medicals

You can only benefit from the unique position RPS has within the wider business community.

Why are we unique? The Occupational Health advice we provide is balanced and complimented by our Occupational Hygiene service and the wide range of Health, Safety and Environmental services.

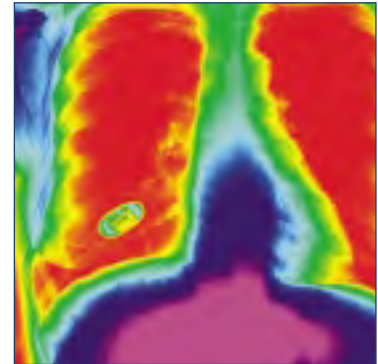

This integrated service capability is unrivalled in today's business environment.

You may feel that, whilst being an attractive option, this is not something you have considered as appropriate for you.

Numerous companies have, for a number of reasons, had the same feeling upon seeing such a wide range of services available to them from one single supplier.

However; when they had taken the time to weigh up the value of such a partnership they realised it made good commercial sense.

The benefits to you include huge time and cost savings through economies of scale and reduced management and administration time as well as continuity of services and consistency of high quality service provision.

RPS Health, Safety and Environment provides the following services:

- Asbestos Consultancy
- Contaminated Land
- Disability Access Auditing
- Emissions Monitoring
- Environmental Due Diligence
- Environmental Management
