

## Health, Safety and Environmental Training

*Providing integrated solutions to suit your business needs*

**Course Title: Asbestos Awareness**

**Course Duration: Half day**

**Thank you for your interest in RPS Health, Safety and Environment training services.**

**By undertaking training with RPS, the largest Health, Safety and Environmental Consultancy in Europe, you will be able to achieve a level understanding and competence to meet the ever-increasing demands of legislation.**

### Course Syllabus

This course is designed to increase the general awareness of asbestos within the working environment and is particularly relevant to building managers and employees who may be accidentally exposed to asbestos containing materials during the course of their work activities. The standard course can be tailored to meet client specific requirements, to include items such as asbestos policy documentation, or, a demonstration of the RPS asbestos management database system. The standard course content includes the following topics:

- Background and history
- Health effects
- HSE video presentation
- Asbestos in buildings
- Legislative requirements
- Management of asbestos containing materials
- Demonstration of RPS asbestos management database
- Question and answer session (optional short test)

The course is suitable for all employees and is delivered with a slightly informal approach using a combination of PowerPoint graphics, video use and flipchart use. To allow for effective training the course will accommodate a maximum of 12 delegates. An optional short test can be carried out at the end of the training session to provide the employer with evidence of course understanding and upon achieving a determined pass rate; a certificate will be issued to each delegate.

### Benefits

- Legislative compliance
- Reduced risk of exposure to asbestos
- Reduced risk of prosecution and claims
- Improved safety culture and staff morale
- Increased awareness of techniques for managing asbestos containing materials
