

Executive Health Assessments Maintain your most valuable asset

Your employees are your most valuable asset.

RPS's Executive Health Assessment Programme is founded on the fundamental principal that prevention is better than cure.

Early detection of, and intervention in, health problems of key staff is consistent with this principal. It also clearly demonstrates your commitment to your employee's current and future health and well being.

What are the benefits to you?

- Early detection of health issues
- Feedback to individual employees
- Improved staff morale
- Increased productivity
- Increased profits

How can RPS help you?

RPS, as a leading Occupational Health provider, offers a broad based Executive Health Assessment from its national network of clinics.

Individuals are guided through a series of medical procedures by a combination of Occupational Health Nurse and Occupational Physician and each participant is provided with their results and a detailed action plan following analysis of the results.

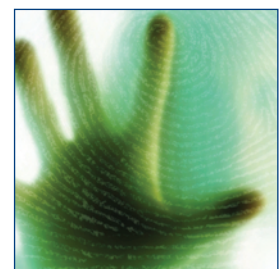

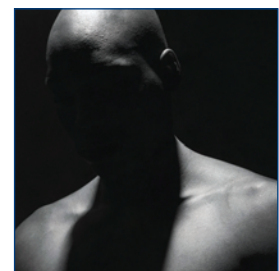

Assessments are confidential and include:

- Life-style review
- Lung function test
- Resting ECG
- Blood pressure
- Urinalysis
- Full blood analysis
- Vision test
- Height and weight

Each assessment lasts approximately 1 1/2 hours with detailed feedback then being provided to the individual.

Taking a proactive approach to managing the health of your key people makes good business sense.

In addition it clearly demonstrates your commitment to your staff.

You can only benefit from the unique position RPS has within the wider business community.

Why are we unique? The Occupational Health advice we provide is balanced and complimented by our Occupational Hygiene service and the wide range of Health, Safety and Environmental services.

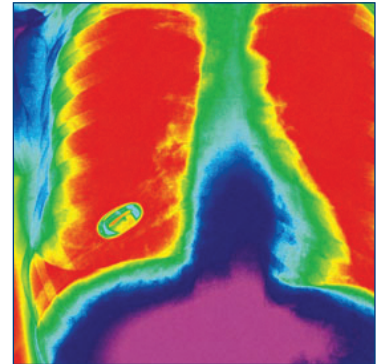

This integrated service capability is unrivalled in today's business environment.

You may feel that, whilst being an attractive option, this is not something you have considered as appropriate for you.

Numerous companies have, for a number of reasons, had the same feeling upon seeing such a wide range of services available to them from one single supplier:

However; when they had taken the time to weigh up the value of such a partnership they realised it made good commercial sense.

The benefits to you include huge time and cost savings through economies of scale and reduced management and administration time as well as continuity of services and consistency of high quality service provision.

RPS Health, Safety and Environment provides the following services:

- Asbestos Consultancy
- Contaminated Land
