

# RESERVOIR IMAGING LTD

## About Reservoir Imaging Ltd (RIL)

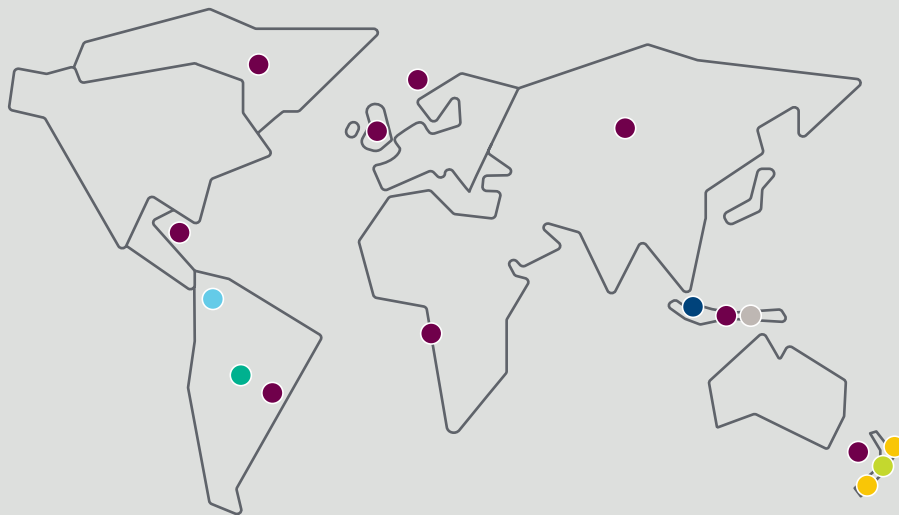

- Formed in 2005 to serve the demand for 3D and 4D seismic surveys for energy clients
- Talented team of software developers, expert in the planning of marine seismic data acquisition surveys
- Passionate about quality, safe, cost efficient data solutions
- The Osprey software suite is the team's own and it comes with robust data management and historic and recent survey data from multiple geographies

## Deep expertise

- Techniques to optimise offshore and infield 3D/4D surveys – baseline and monitoring
- Optimisation technology that drives efficient seismic surveys
- Technology to prevent seismic interference (SI) between vessels
- Simultaneous operations management to deliver improved project outcomes

## RPS and RIL – stronger together

- Creates a potent combination of great people, data and modern, digital-age technologies who will deliver higher value solutions and experiences for clients
- We are united in how we want to enable energy clients to make sound investment decisions

RPS and RIL have been working together since 2016 delivering 3D/4D seismic optimisation surveys for oil & gas clients around the globe.

### Projects

- **Apache Suriname** (South America)
- **Shell** (Colombia, South America)
- **Schlumberger Pegasus** North & South (New Zealand)
- **Schlumberger Sabah** (Malaysia)
- **Schlumberger Western Platform** (New Zealand)
- **Petroleum Geo-Services** (Indonesia)

### Geographies

- **UK/Norwegian North Sea, Gulf of Mexico, Canada, West Africa, Russia, Brazil, Asia Pacific**
