

# 3rd QUARTER 2020 NEWSLETTER

## COMPLIANCEMAP

ComplianceMap is a flexible and easy to use EHS platform. Over 1,000 global clients currently use ComplianceMap to track and complete compliance obligations, store plans and permits, list assets and associated registrations and perform dynamic evaluations, all through a calendar-based interface. Learn more at [rpsgroup.com/compliancemap](https://rpsgroup.com/compliancemap)

### New Feature – Accident Reporting

Report incidents and injuries based on OSHA 301 form:

Through the ComplianceMap Accident Log module, companies can manage all required incident information:

Enter all details and information associated with an accident, near miss, or loss; that is required by the OSHA 301 Form.

Track and monitor accidents and total time loss across locations, regions, or the entire company

Automatically generates all required OSHA forms (300, 300A, and 301)

Stores all historical data and generated OSHA forms for your records

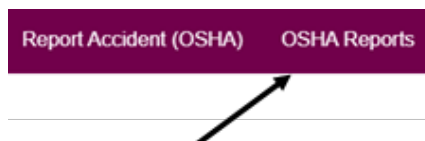

Accident and Incident Preliminary Report Form

## RPS ComplianceMap Tip of the Quarter – Generate OSHA Reporting Forms

The Accident Log Module allows users to generate and download official OSHA Forms 300, 300A, and 301. To generate the forms follow these steps:

Inside the Accident Log Module. Choose “OSHA Reports” from the top toolbar

Choose the desired report from the dropdown list and click “OK”. The report will automatically begin download.
